#### ***Allowable Subject Matter***

4. Claims 1-20 are allowed.

The following is an examiner’s statement of reasons for allowance:

The allowability of the independent claims resides, at least in part, in that closest prior art of record Hollister et al. (Homgenization Sample procedure for calculating Trabecular Bone Effective Stiffness and tissue Level Stress) does not disclose or suggest, alone or in combination, determining a numerical weighting factor based on a

Art Unit: 2123

predicted time-based elastic or molecular weight degradation pattern; weighting said material density distribution mad using [[a]] said numerical weighting factor to determine a weighted density distribution map; and using said weight density distribution map to determine a material reinforcement to create a final designing shape such that the device will retain predetermined structural properties during a material degradation lifecycle, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
